digiGate
Complete Control.

Mobile • Web • Dial To Enter
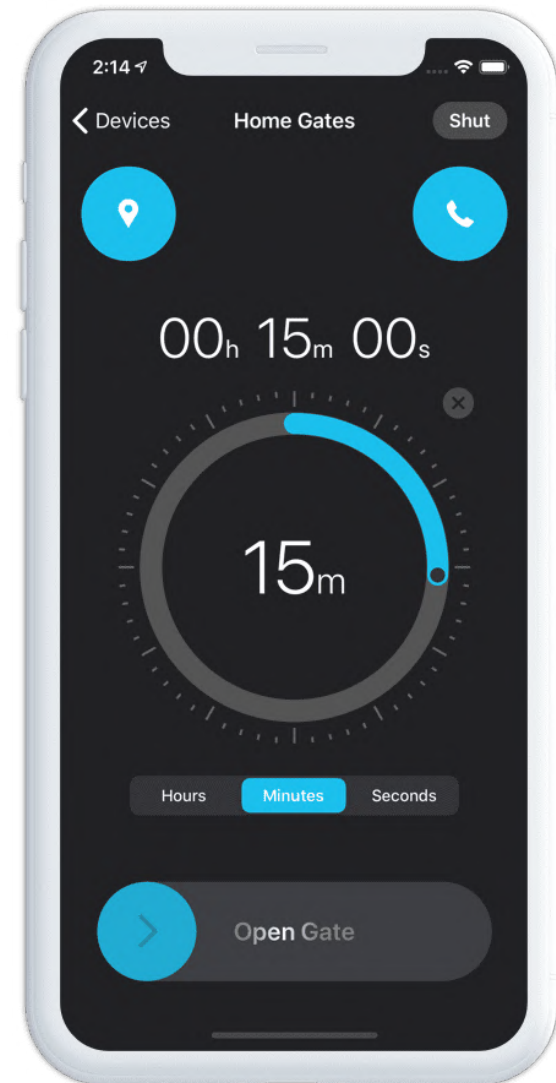

Make your electric gate smart.
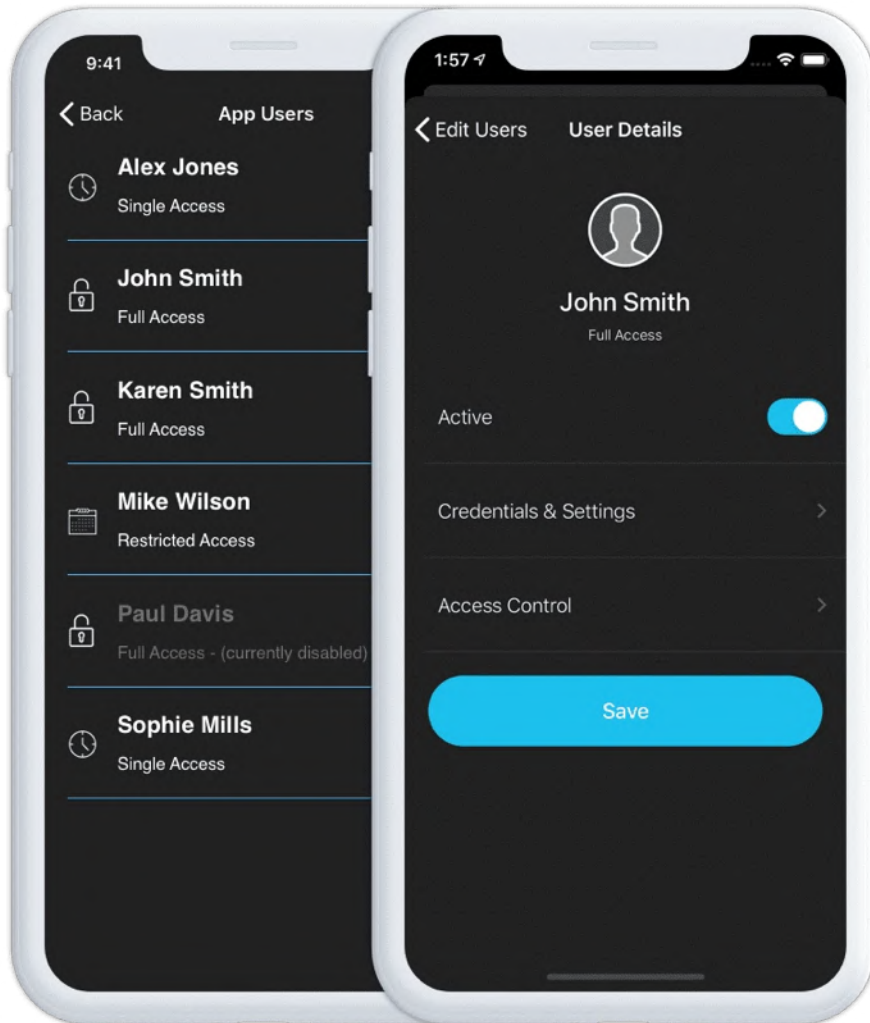

digiGate Electric Gate System

digiGate connects to your electric gates and enables you to control them via the **mobile app**, **web**, and **GSM 'dial to open'**.

Control the Gate

Open, latch open and close the gate from anywhere with the mobile app.

- Hold the gate open for deliveries, guests arriving etc.
- Select any duration up to 24 hours.
- You decide who has access to latching the gate.

Unlimited User Accounts

Manage all your users from within the digiGate mobile app. Anywhere. Anytime.

Creating a user account takes seconds and you can grant/deny access at any time.

Only admin accounts can manage users.

User Access Control Management

digiGate has 3 types of user access restrictions, all easily administered via the app.
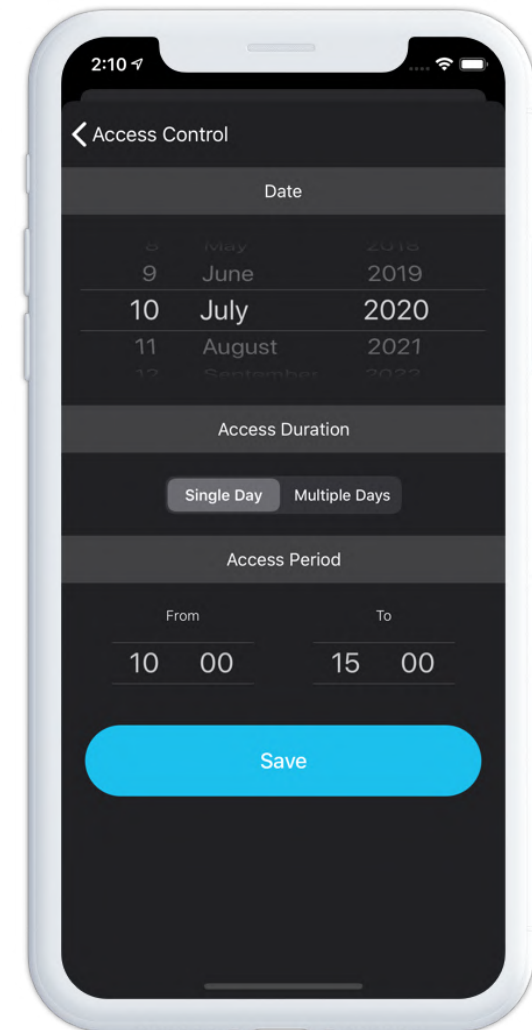

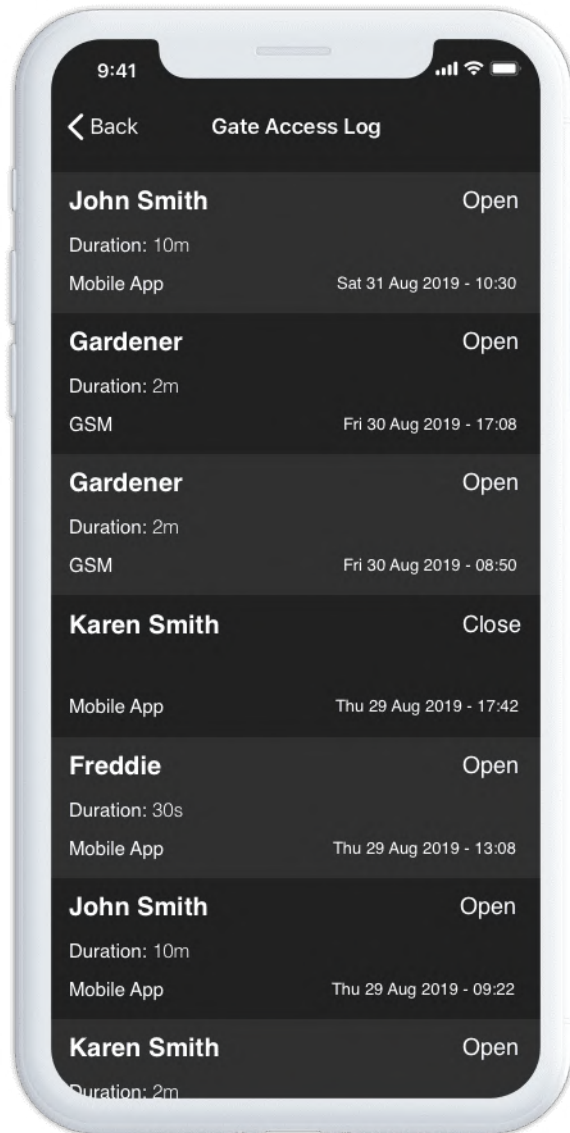

Full access
User has 24/7 access.

One-off access
User has access between 2 times on a certain date or between two dates.

Restricted regular access
Limited access between certain times on certain weekdays, every week.

Access Log

View who has accessed the gate, when and for how long, all within the mobile app.

Log entries are saved on a 30-day rolling basis.

Automatic Proximity Opening

Open the gate automatically when you arrive. Totally hands free.

Drive straight in by setting the ideal distance you want to be from the gate before it should start opening.

Easily configured within the digiGate app with no extra modules required.

Dial to open

Install the additional USB GSM module to enable you and your visitors to open the gate with a phone call.

Simply insert a SIM card and add authorised phone numbers via the mobile app.

Authorised visitors dial the number, the call gets cancelled and the gate opens. No charge to the visitor or the module's SIM.

Scheduling

digiGate has a built-in weekday and calendar schedule.
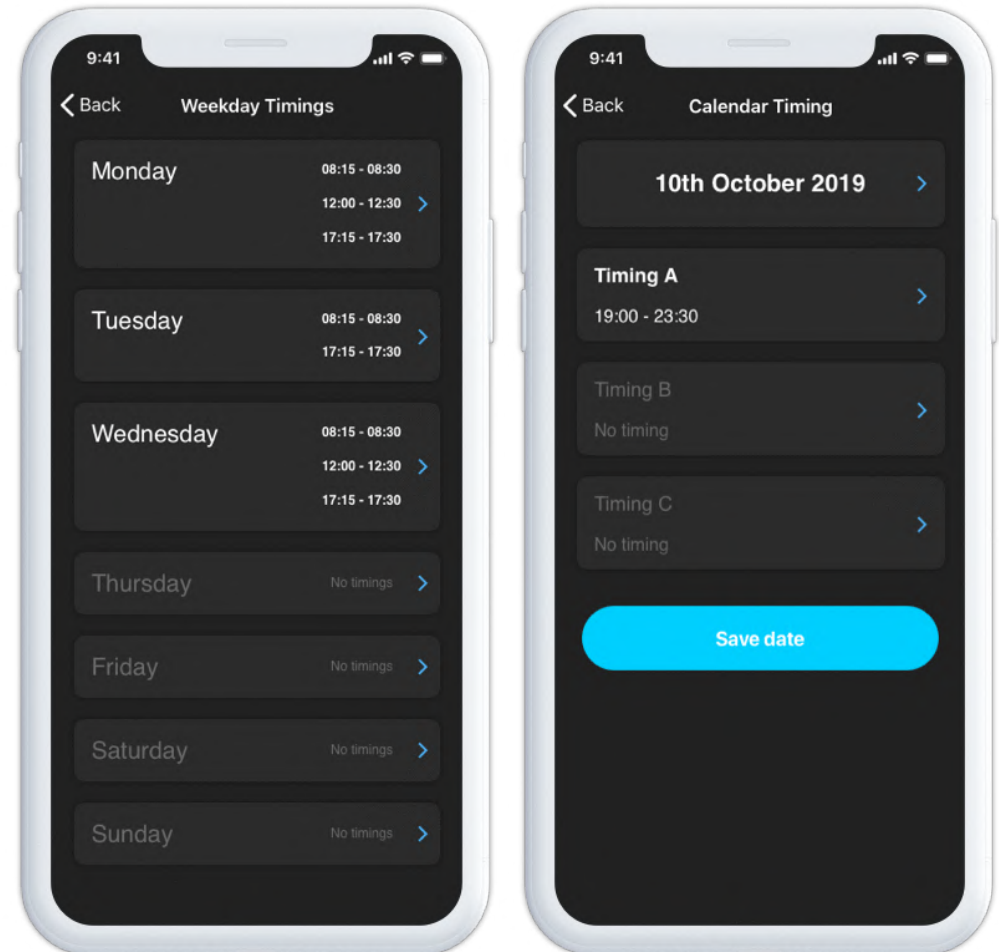

Weekday schedule
Have the gate open automatically on certain weekdays between certain times.
Save up to 3 timings per day.

Calendar schedule
Have the gate open automatically on one-off dates between set times.
Save up to 3 timings per date.

Web Control

digiGate has a built-in web dashboard which can be accessed from any computer or mobile device.

Manage user accounts, set schedules, change settings and open/close the gate.

Phone numbers can also be uploaded via spreadsheet for sites with a large number of 'dial to open' users.

Voice Control

digiGate can be setup with IFTTT for free, meaning you can control it with your voice.

Connect with Amazon Alexa, Siri & Google Assistant.

Works with Existing Controls

digiGate systems work seamlessly alongside existing remote controls, keypads, ground loops or any other accessories you have.

iOS and Android Compatible

The digiGate mobile app is free to download and available on both iOS and Android devices.
